BULK SYSTEM CHIPS

OEM SIZE CHIPS

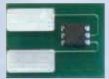

TYPES OF CHIPS

OEM-Size Chip

OEM-sized chips can be mounted directly onto the 220ml or 440ml cartridge in place of an OEM chip.

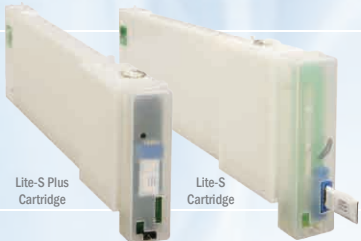

Lite-S Chip

Lite-S chips have been designed for use on a bulk system. They can be easily changed without needing to unplug the cartridge.

Multi-Liter Chip

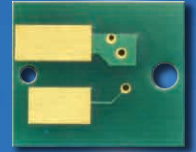

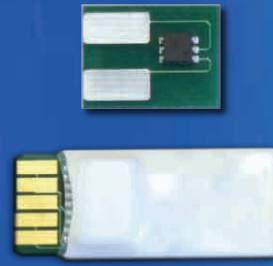

Multi-Liter Chip will reset itself at a low ink level, so it doesn't need to be changed until a certain amount of ink has been consumed. It connects to the same connector as a Lite-S chip, or to a specially designed for it **Lite-S Plus** cartridge.
