

Affordable Bulk Ink Feeding System for Mimaki, Roland & Mutoh

The World's Best

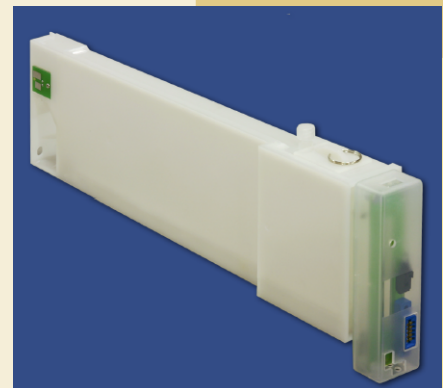

InkStream Lite-S systems have been recognized around the world as the top quality product that combines low cost, ease of operation, reliability, simplicity and great functionality.

Features:

- Works with solvent, eco-solvent or water-based inks.
- Works with any existing JV3 firmware including 6.X. JV3 would recognize our system as a set of genuine cartridges.
- Low maintenance and simplicity of operation.
- Allows an uninterrupted production.
- Built-in filters protect print heads from clogging.
- Ink bottles hold one liter of ink and can be refilled any time.
- The system has a number of reliability features that will ensure you never stop production.
- Modular design, easy to repair and upgrade to an automatic Pro-S.

The most economical bulk system would include only the refillable cartridges that can be filled through the top opening.

Our proprietary 450ml refillable cartridge.
